DESCRIPTION

The KNC-SRV-MD60-020 Integrated Servo System includes a 200 Watt Servo Motor, operated by the Servo Drive. Each system includes a Servo Motor ranging from a size of 60mm square, power rating of 200 Watts, with a Servo Drive attached to the top of the Servo Motor. These packages are ideal and provide easy start-ups, convenience, and performance. The Servo Motors included in these packages provide torque up to 91 oz-in. The Servo Drive is designed to switch dynamically among different control methods for more flexible operation and can operate position control mode either with pulse and direction inputs, internal position points, or internal speed points.

Note: The CBL-AA7462 Cable is required for programming the KNC-SRV-MD Series Integrated Servos via Kinco Servo+ Software.
