## 34D Series

- NEMA Size 34 Round Stepper Motor
- Best Selection for High Speed Applications
- $1.8^{\circ}$ Step Angle
- Torque - Up to 630 oz-in
- Can be Customized for
- Winding Current
- Shaft Options
- Cables and Connectors
- Lead Configuration
- Conduit Box

The 34D Series Stepper Motors is a standard (round-bodied) style stepper motor. They have lower rotor inertia than square high torque motors which allow them to accelerate faster and offer higher torque at speeds greater than 25 revolutions per second. These motors are an excellent choice to replace many of the round stepper motors that were popular for many years. The motor comes in a standard 6 -lead configuration with a broad line of motor windings and stack lengths available off-the-shelf. Anaheim Automation can also customize the winding to perfectly match your voltage, current, and maximum operating speed. Special shaft modifications, lead configuration, conduit box, cables and connectors are also available upon request. Often referred to as "legacy motors," the 34D series is a good cross to the Superior Electric Slosyn series M091, M092, and M093.

Notes: The 7th character " S " denotes a single shaft, use " $D$ " for double shaft. Custom leadwires, cables, connectors, and windings are available upon request. 8 lead wire and conduit box configurations are also available.

(All units are inches)

| Connection | Lead Wire Connection | Lead Wire Color |
| :---: | :---: | :---: |
|  | Phase 1 (A) | Red |
| 4 - Lead Bipolar Series | Phase 3 (IA) | Red/White |
| MBC, MLP, or MLA Series | Phase 2 (B) | Green (GRN) |
| Do Not Connect | Phase 4 (IB) | GRN/WHT |
| Do Not Connect |  | Black (BLK) |
|  |  | White (WHT) |
|  |  | Red |
|  | Phase 1 | Red/WHT |
| 6- Lead Unipolar | Phase 3 | Green (GRN) |
| BLD, TM Series | Phase 2 | GRN/WHT |
|  | Phase 4 | Clack (BLK) |
|  | Common Phase 1 \& 3 | White (WHT) |
|  | Common Phase 2 \& 4 |  |

| Step Angle Accuracy: | $+/-5 \%$ of one step |
| :--- | :--- |
| Resistance Accuracy: | $+/-10 \%$ |
| Inductance Accuracy: | $+/-20 \%$ |
| Temperature Rise: | $100^{\circ} \mathrm{C}$ |
| Ambient Temperature: | $-20^{\circ} \mathrm{C}$ to $+50^{\circ} \mathrm{C}$ |
| Insulation Type: | Class B |
| Insulation Resistance: | 1000 M Ohms at 500 VDC |
