DESCRIPTION

Anaheim Automation’s 11AW Linear Stepper Motors are designed to be the most versatile linear positioning motors on the market. These robust linear actuators, available in non-captive or external linear options, use a NEMA 11 hybrid stepper motor, and can be easily configured to solve difficult application problems. Integration of a lead screw with a motor saves space, eliminates components, and reduces cost. While many standard configurations are available, custom modifications for OEM customers are welcome.
