

23Y9 Series - High Torque 0.9° Stepper Motor

FEATURES

- **NEMA 23 Frame Size**
- **0.9° Step Angle**
- **High Torque - Up to 270 oz-in**
- **High Step Accuracy and Resolution**
- **Shaft Flat as Standard**
- **Can be Customized for**
 - **Winding Current**
 - **Shaft Options**
 - **Cables and Connectors**
- **CE Certified and RoHS Compliant**

DESCRIPTION

The 23Y9 Series High Torque Stepper Motors offer a great value without sacrificing quality. These motors have a 0.9° step angle making them higher precision than the typical 1.8° version. However, like the standard versions, these motors were designed to offer the highest possible torque while minimizing vibration and audible noise. A broad line of motor windings and stack lengths are available. The standard 8-lead motors can be connected in all possible configurations: series, unipolar, or parallel, to allow the maximum flexibility for your application. We can also customize the winding to perfectly match voltage, current, and maximum operating speed to meet your requirements.

See [Accessories](#) on this website for optional motor adders such as encoders, brakes, cables and connectors. For gearbox options, see [Gearboxes](#). For compatible drivers for the 23Y9 Series, see the [MBC050641](#), [MBC12101](#) or [Driver Packs](#).
