DESCRIPTION

The KNC-HMI-MK070E-33DT HMI with integrated PLC provides a reliable system to help your application run smoothly and efficiently. This HMI/PLC combination features a 256K color display mode that enhances your touch screen with rich color and incomparable resolution. The IP65-rated front screen is protected against dust ingress and may be subjected to low-pressure water jets. On the backside, the PLC is directly attached and integrated into the same package with the HMI. The PLC provides special I/O functions, a USB2.0 (USB-B Connector) programming port, four high-speed counters, four high-speed outputs, two RS485 communication/serial port(s), model dependent, integrated digital input and output channels, and more. Built-in high-speed pulse outputs can reach a maximum frequency of 50 KHz. KincoBuilder software provides absolute and relative positioning, homing, jogging, and quick stop instructions for programming the PLC functions, while DTools software is a convenient and powerful configuration software that allows the user to create first-class, efficient programs for the HMI. KincoBuilder and DTools software are both required to operate this integrated device, and are available for free on our website. With a quick and easy set-up, the KNC-HMI-MK070E-33DT series is an intelligent choice for users who need the functionality of an HMI and PLC in one powerful, streamlined package.
