DESCRIPTION

Anaheim Automation's 23AW leadscrew Stepper Motors were designed to be the most versatile linear position motors in today's market. These robust linear actuators, available in non-captive, external linear, or anti-backlash options, use a NEMA 23 hybrid stepper motor, and can be easily configured to solve difficult application problems. Integration of a leadscrew with a motor saves space, eliminates components, and reduces cost. While many standard configurations are available, custom modifications for OEM customers are welcome.
